Hi Cos and Jen,

I just hit send on the response to Ramez. Jen, I added a bit more information on some of the water issues from the draft which you reviewed.

Thank you again for your guidance on this response. There's a lot on the plate with PADEP.

Subject: Response to Dec. 2nd Email

Hi Ramez,

Thank you for the list of issues submitted on December 2, 2020 being worked on with EPA Region 3.

I raised the issues with EPA R3 program directors to be sure that they are aware of the issues, to gain more information on the issues identified by PADEP, and to determine other issues our respective agencies should be aware of as we approach the transition to the Biden-Harris Administration. Please see the attached letter for a summary of our responses and additional issues for coordination in the upcoming year.

I appreciate the ongoing coordination and joint efforts of our agencies. I recommend that we schedule joint sessions with our program directors to discuss in more detail, the issues which you raised in your email and the additional issues facing us in 2021. Paul Leonard or I will contact you to coordinate meetings. I look forward to continuing our partnership.
